It was wonderful to be back in London to host family offices from all over Europe at our Europe Family Office Summit.

The programme was packed with topics highly relevant to family offices in the region, giving insight into the issues that will shape the way we all do business in the coming months and years.

Over two days of talks, panels, round table discussions and multiple informal networking breaks, we were able to bring together family offices and those who wanted to do business with them.

Who was there?

- There were 97 single family offices from the UK, Europe and the Middle East.
- 30 service providers attended to meet and mingle with the family offices.
- Our Summit Partner was Unicorn.
- Global Counsel were our co-branding partners.
- Speakers included Lord Mandelson, UK.

Background

This summit was aimed very specifically at family offices, and – like all our events – is unique in that it is organised by experts from a family office background.

We constantly liaise with the regional and global business community, and monitor wider current affairs, so that we can bring our delegates the most up-to-date and useful information to help them navigate their family offices to further long-lasting success.

Our focus is not only on business, but on every aspect of running a family office, including legacy, personal wellbeing and lifestyle.

By creating an informal environment in which speakers and delegates can share their expertise and experiences with one another, we also offer a unique opportunity to bring family offices together and find new ways to work with and learn from one another.

The Programme

We discussed the leading topics of the day, including what's new in cryptocurrency, new technological advancements, sustainable investment, fintech in a post-Brexit world, and how some family offices were able to thrive throughout the pandemic.

This was in addition to evergreen subjects such as real estate investment, sport investment, private equity and venture capital, family office governance, and wealth preservation.

We were also fortunate to hear from Lord Peter Mandelson on the future of Europe, and from Abdulla Al Gurg on how he turned both his life and his family office around for the better.

Testimonials

"Once again it was an excellent, quality event with prudently chosen current interesting topics that were brainstormed by key Industry professionals. Almost everyone stayed till the last session which demonstrates focused engagement and complete satisfaction for this summit. I felt the attendees were motivated and inspired with the contents and meeting like-minded professional to enhance their connections beyond their sectors as well."

Waheed Kaiser
